

## Subject Index

Abbreviations; TPN, total parenteral nutrition

### A

- Abdominal radiation, glutamine effects on intestinal mucosal integrity and bacterial translocation after, 199
- Aged, weight/skeletal size/body mass in the, 18
- Amino-acids
  - peripheral tissue energy metabolism during recovery from hypothermia after cardiopulmonary bypass and the effects of infusions of, 30
  - plasma
    - branched-chain, elimination in non-obese type 2 diabetes mellitus, 105
    - elective cholecystectomy and clearance of, 10
- Anorexia nervosa malnutrition, serum cortisol/CD4<sup>+</sup> and CD8<sup>+</sup> lymphocyte subpopulations/T cell mediated suppression of immune responses in, 167
- Anthropometric variables in gastrointestinal cancer, short-term pre-operative intravenous nutrition and its effects on, 213
- Antimicrobials, non-absorbable oral, in management of D-lactate associated encephalopathy in short bowel syndrome, 352

### B

- Bacteria, *see also* Antimicrobials
  - contamination and growth in two formula diets of different pH, 114
  - translocation, glutamine effects on, after abdominal irradiation, 199
- Bile, *see entries under* Chole-
- Bioelectrical impedance analysis, renal dialysis and the assessment of changes in total body water by, 81
- Body weight/mass/size in the over-65s, 18
- Bowel, *see* Intestine
- Branched-chain amino-acids, elimination from plasma in non-obese type 2 diabetes mellitus, 105
- Breast cancer, food intake/eating-related complaints/smell and taste sensations in patients undergoing chemotherapy for, 336
- Bypass
  - cardiopulmonary, peripheral tissue energy metabolism during recovery from hypothermia after, effect of amino-acid infusions on, 30
  - jejuno-ileal, intestinal adaptation following, 138

### C

- Cachexia, energy expenditure and protein synthesis in, 23
- Cancer, *see also* Tumour
  - cachexia of, energy expenditure and protein synthesis in, 23
  - gastrointestinal, short-term pre-operative intravenous nutrition in, anthropometry/protein synthesis/immunological variables related to, 213
  - lung/ovary/breast, food intake/eating-related complaints/smell and taste sensations in patients undergoing chemotherapy for, 336
  - tumour cell proliferation in parenterally fed patients with, energy substrate manipulation affecting, 228
- Carbohydrate over-feeding, intravenous, as method for rapid nutritional repletion, 146
- Cardiopulmonary bypass, peripheral tissue energy metabolism during recovery from hypothermia after, effect of amino-acid infusions on, 30
- Carnitine
  - depletion, experimental, 91
  - supplementation in TPN, lipid/energy/nitrogen metabolism and effects of, in severely ill patients, 97
  - tissue, food restriction and its effects on, 85
- Catheters, central venous
  - pneumopericardium as a complication with, 128
  - Silastic®, migration into right jugular vein, 173
- CD4<sup>+</sup>/CD8<sup>+</sup> ratios in anorexia nervosa malnutrition, 167
- Chemotherapy for lung/ovary/breast cancer, food intake/eating-related complaints/smell and taste sensations in patients undergoing, 336
- Children, malnourished, effects of glucose vs. fat-glucose mixtures in TPN on energy metabolism and substrate utilisation in, 272 *see also* Infants
- Cholecystectomy, elective, plasma amino-acid clearance and hepatic urea synthesis after, 10
- Cholecystokinin levels in relation to effects of artificial feeding on cholestasis/gallbladder sludge/lithiasis, in infants, 320
- Cholestasis in infants, effects of artificial feeding on, cholecystokinin levels and, 320
- Cholesterol-lowering effect of continuous enteral nutrition, 279

- Continuous enteral nutrition, cholesterol-lowering effect of, 279
- Continuous peripheral parenteral nutrition, phlebitis incidence in cyclic vs., 315
- Copper, plasma concentrations in dietary vitamin E deficiency, 233
- Cortisol, serum, in anorexia nervosa malnutrition, 167
- Critically ill patients, *see* Intensive care patients
- Crohn's disease treated with elemental diet, serum soluble interleukin-2 receptor levels in, 222
- Cuthbertson Lecture: teleological view of sepsis, 1
- Cyclic peripheral parenteral nutrition, phlebitis incidence in continuous vs., 315

## D

- Defense, host, intravenous lipid emulsions and, 303, *see also* Immune responses
- Diabetes mellitus, non-obese type, elimination of infused branched-chain amino-acids, 105
- Dialysis, renal, assessment of changes in total body water in, 81
- Diet(s), *see* Feed; Feeding; Food
- Drug metabolism, liver factors involved in, ornithine  $\alpha$ -ketoisocaproate effects on, in renal infection model, 328

## E

- Eating-related complaints in lung/ovary/breast cancer patients undergoing chemotherapy, 336
- Elderly, weight/skeletal size/body mass in the, 18
- Elemental diet, Crohn's disease treated with, serum soluble interleukin-2 receptor levels in, 222
- Emulsions, intravenous lipid, host defense and, 303
- Encephalopathy, D-lactate associated, in short bowel syndrome, management with non-absorbable oral antimicrobials, 352
- Endotoxin effects on intestinal permeability, 43
- Energy metabolism/expenditure/balance
  - cancer cachexia and, 23
  - carnitine-supplemented TPN and its effects on, in severely ill patients, 97
  - in depleted patients undergoing gastrointestinal surgery, 36
  - glucose vs. fat-glucose mixtures in TPN in malnourished children and their effects on, 272
  - peripheral tissue, during recovery from hypothermia after cardiopulmonary bypass, effect of amino-acid infusions on, 30
  - in septic and injured intensive care patients, parenteral nutrition and its effects on, 258
- Energy substrate manipulation, effects on tumour cell proliferation in parenterally fed cancer patients,

228

## Enteral nutrition

- bacterial contamination and growth in two formula diets of different pH for, 114
- continuous, cholesterol-lowering effect of, 279
- enterocyte function, glutamine dependence of, 125

## F

- Fat-glucose mixtures vs. glucose on TPN, effects on substrate utilisation and energy metabolism in malnourished children of, 272
- Fat-soluble vitamins A and E, clinical adsorption and photodegradation of, 348
- Fatigue, post-operative, metabolic effects of surgery on nutritional stores in relation to, 251
- Feed(s) (diets), formula, of different pH, bacterial contamination and growth in two, 114
- Feeding
  - in infants, cholestasis/gallbladder sludge/lithiasis and effects of artificial, cholecystokinin levels in relation to, 320
  - over-, fever caused by, in intensive care patients, 266
- Feeding jejunostomy for post-operative nutritional support, 298
- Fever caused by over-feeding in intensive care patients, 266
- Food/dietary intake, *see also* Eating; Feed; Feeding
  - in lung/ovary/breast cancer patients undergoing chemotherapy, 336
  - restriction
    - intramuscular glutamine and protein synthesis in severe, 120
    - tissue carnitine levels and the effects of, 85
- Formula diets of different pH, bacterial contamination and growth in two, 114

## G

- Gallbladder sludge in infants, effects of artificial feeding on, cholecystokinin levels and, 320, *see also* entries under Cholecysto-
- Gastrointestinal tract, *see also specific regions*
  - cancer, short-term pre-operative intravenous nutrition in, anthropometry/protein synthesis/immunological variables related to, 213
  - surgery, malnourished patients undergoing, nitrogen and energy balance in, 36
- Glucose vs. glucose-fat mixtures in TPN, effects on substrate utilisation and energy metabolism in malnourished children of, 272
- Glutamine
  - enterocyte function and its dependence on, 125

intestinal mucosal integrity/bacterial translocation and the effects of, after abdominal irradiation, 199

intramuscular concentration, severe dietary restriction and its effects on, 120

metabolism, Proceedings of the Second International Workshop on (Sept. 1989), 125

stability in solution, 186, 193, 357

## H

Heparin, thrombophlebitis in peripheral intravenous nutrition and the effects of, 309

Hepatic tissue, *see* Liver

Host defense, intravenous lipid emulsions and, 303

Hydrocortisone, thrombophlebitis in peripheral intravenous nutrition and the effects of, 309

Hypothermia during cardiopulmonary bypass, peripheral tissue energy metabolism during recovery from, effect of amino-acid infusions on, 30

## I

Ileal-anal pouch anastomosis, nutritional status of patients undergoing, 292

Ileal mucosa of fed/starved rats, dietary whey proteins (and their peptides/amino-acids) and their effects on, 49

Immune responses, T cell mediated, in anorexia nervosa malnutrition, 167, *see also* Defense

Immunological indices in gastrointestinal cancer, short-term pre-operative intravenous nutrition and its effects on, 213

Infants, cholestasis/gallbladder sludge/lithiasis and effects of artificial feeding in, cholecystokinin levels in relation to, 320

Infections, *see also* Sepsis

acute, zinc status and the effects of, 55

acute systemic, intestinal permeability in, 76

renal, liver factors involved in drug metabolism in, ornithine  $\alpha$ -ketoisocaproate effects on, 328

Injured intensive care patients, nitrogen and energy balance and the response to parenteral nutrition of, 258

Insulin-like growth factor-1, *see* Somatomedin-C

Intensive care/critically ill/severely ill patients

fever caused by over-feeding in, 266

lipid/energy/nitrogen metabolism and effects of carnitine-supplemented TPN, 97

septic and injured, nitrogen and energy balance and the response to parenteral nutrition in, 258

Interleukin-2 receptor levels in Crohn's disease treated with elemental diet, serum soluble, 222

Intestine (bowel), *see also specific regions*

bacterial translocation in, after abdominal irradiation, glutamine effects on, 199

failure, TPN for, enhanced retention of urea-nitrogen with, 67

jejuno-ileal bypass and adaptation of, 138

mucosa, *see* Mucosa

permeability

in acute systemic infections, 76

endotoxin and turpentine effects on, 43

short, syndrome of, D-lactate associated encephalopathy in, management with non-absorbable oral antimicrobials, 352

Intravenous catheters, central, *see* Catheters

Intravenous lipid emulsions, host defense and, 303

Intravenous nutrition (intravenous parenteral nutrition)

peripheral

phlebitis in, *see* Phlebitis

thrombophlebitis in, osmolality/heparin/hydrocortisone effects on, 309

short-term pre-operative, in gastrointestinal cancer, anthropometry/protein synthesis/immunological variables related to, 213

Irradiation, abdominal, glutamine effects on intestinal mucosal integrity/bacterial translocation after, 199

## J

Jejuno-ileal bypass, intestinal adaptation following, 138

Jejunostomy, feeding, for post-operative nutritional support, 298

Jugular vein, Silastic® central venous catheter migration into right, 173

## K

Kidney, *see entries under* Renal

## L

D-Lactate associated encephalopathy in short bowel syndrome, management with non-absorbable oral antimicrobials, 352

Lipid, carnitine-supplemented TPN and its effects on metabolism of, in severely ill patients, 97

Lipid emulsions, intravenous, host defense and, 303

Lipid/energy/nitrogen metabolism and effects of carnitine-supplemented TPN, critically ill patients, 97

Lithiasis in infants, effects of artificial feeding on, cholecystokinin levels and, 320

**Liver**

factors involved in drug metabolism in, ornithine  $\alpha$ -ketoisocaproate effects on, in renal infection model, 328

urea synthesis, see Urea

Lung cancer, food intake/eating-related complaints/smell and taste sensations in patients undergoing chemotherapy for, 336

Lymphocyte mediated suppression of immune responses and subpopulation ratios in anorexia nervosa malnutrition, 167

**M****Malnourished patients**

with anorexia nervosa, serum cortisol/CD4<sup>+</sup> and CD8<sup>+</sup> lymphocyte subpopulation/T cell mediated suppression of immune responses in, 167

glucose vs. fat-glucose mixtures in TPN and their effects on energy metabolism and substrate utilisation in paediatric, 272

nitrogen and energy balance before and after major gastrointestinal surgery in, 36

Mass, body, in the over-65s, 18

Metabolic effects of surgery, body nutritional stores and post-operative fatigue in relation to, 251

Metabolic support, post-operative, plasma-specific protein response to surgical trauma and tumour load modified by, 179

Metabolism, drug, liver factors involved in, ornithine  $\alpha$ -ketoisocaproate effects on, in renal infection model, 328

**Mucosa (intestinal)**

glutamine effects on integrity of, after abdominal irradiation, 199

ileal, of fed/starved rats, dietary whey proteins and their peptides/amino-acids and their effects on, 49

**N**

Nitrogen equilibrium, nutritional sensitivity of diurnal cycling of body protein enabling measurement of protein deposition in subjects in, 239

**Nitrogen metabolism/balance**

carnitine-supplemented TPN and its effects on, in severely ill patients, 97

in depleted patients undergoing gastrointestinal surgery, 36

in septic and injured intensive care patients, parenteral nutrition and its effects on, 258

**O**

Old people, weight/skeletal size/body mass in, 18

Ornithine  $\alpha$ -ketoglutarate, efficacy as dietary supplement in growing rats, 155

Ornithine  $\alpha$ -ketoisocaproate effects on liver factors involved in drug metabolism in renal infection model, 328

Osmolality in peripheral intravenous nutrition, thrombophlebitis and the effects of, 309

Osmolarity in peripheral intravenous nutrition, phlebitis and its relation to, 71

Ovarian cancer, food intake/eating-related complaints/smell and taste sensations in patients undergoing chemotherapy for, 336

Over-feeding in intensive care patients, fever caused by, 266

**P****Parenteral nutrition**

complications, management, 133

intravenous, see Intravenous nutrition

nitrogen and energy balance in septic and intensive care patients and the response, 258

total, see Total parenteral nutrition

tumour cell proliferation in cancer patients on, energy substrate manipulation affecting, 228

Peripheral venous/intravenous nutrition, see Intravenous nutrition

pH, formula diets of different, bacterial contamination and growth in two, 114

Phlebitis in peripheral venous/parenteral nutrition, see also Thrombophlebitis  
continuous vs. cyclic infusion and the incidence of, 315

volume load and osmolarity in relation to, 71

Pneumopericardium as a complication of central venous catheterization, 128

Post-operative fatigue, metabolic effects of surgery on nutritional stores in relation to, 251

Post-operative metabolic/nutritional support feeding jejunostomy for, 298

plasma-specific protein response to surgical trauma and tumour load modified by, 179

Pre-operative intravenous nutrition, short-term, effects on anthropometric variables in gastrointestinal cancer, 213

Pressure sores, nutritional state related to development and healing of, 245

Proceedings of the Second International Workshop on Glutamine Metabolism (Sept. 1989), 125

**Protein(s)**

deposition, nutritional sensitivity of diurnal cycling of body protein enabling measurement of, in subjects at nitrogen equilibrium, 239

plasma-specific, surgical trauma and tumour load-

- related responses, 179
- somatomedin-C measurement in biological evaluation of quality of, plasma, 162
- synthesis
  - in cancer cachexias, 23
  - in gastrointestinal cancer, short-term pre-operative intravenous nutrition and its effects on, 213
  - severe dietary restriction and its effects on, 120
  - wehy (and their peptides/amino-acids), ileal mucosa of fed/starved rats and the effects of dietary, 49

## R

- Radiation, abdominal, glutamine effects on intestinal mucosal integrity/bacterial translocation after, 199
- Renal dialysis and the assessment of changes in total body water, 81
- Renal infection model, liver factors involved in drug metabolism, ornithine  $\alpha$ -ketosuccinate effects on, 328
- Repletion, rapid nutritional, intravenous carbohydrate over-feeding as method for, 146

## S

- Saudi Arabia, nutritional assessment methods in surgical patients living in, value of, 342
- Sensations, food and taste, with lung/ovary/breast cancer patients undergoing chemotherapy, 336
- Sepsis, *see also* Infection
  - intensive care patients with, nitrogen and energy balance and the response to parenteral nutrition of, 258
  - teleological view of, 1
- Severely ill patients, *see* Intensive care patients
- Short bowel syndrome, D-lactate associated encephalopathy in, management with non-absorbable oral antimicrobials, 352
- Silastic® central venous catheter, migration into right jugular vein, 173
- Size, skeletal, in the over-65s, 18
- Skeletal size in the over-65s, 18
- Smell sensation in lung/ovary/breast cancer patients undergoing chemotherapy, 336
- Somatomedin-C (insulin-like growth factor)
  - plasma measurement in biological evaluation of protein quality, 162
  - zinc deficiency-related decline in, 284
- Sores, pressure, nutritional state related to development and healing of, 245
- Substrate utilisation in malnourished children, effects of glucose vs. fat-glucose mixtures in TPN on, 272

- Surgery, *see also* entries under Pre-operative; Post-operative
  - gastrointestinal, malnourished patients undergoing, nitrogen and energy balance in, 36
  - metabolic effects of, on nutritional stores, post-operative fatigue in relation to, 251
  - Saudi Arabia patients for, nutritional assessment methods in, 342
- Surgical, trauma of, plasma-specific proteins in response to, 179
- Systemic infections, intestinal permeability in acute, 76

## T

- T-cell mediated suppression of immune responses and subpopulation ratios in anorexia nervosa malnutrition, 167
- Taste sensation in lung/ovary/breast cancer patients undergoing chemotherapy, 336
- Thrombophlebitis in peripheral intravenous nutrition, osmolality/heparin/hydrocortisone effects on, 309
- Total parenteral nutrition (TPN)
  - carnitine-supplemented, lipid/energy/nitrogen metabolism and effects of, in severely ill patients, 97
  - glucose vs. glucose-fat mixtures in, effects on substrate utilisation and energy metabolism in malnourished children of, 272
  - glutamine stability in solutions used for, 193, 357
  - for intestinal failure, enhanced retention of urea-nitrogen with, 67
- Tumour
  - cells, in parenterally fed cancer patients, energy substrate manipulation affecting proliferation of, 228
  - load, plasma-specific proteins in response to, 179
  - malignant, *see* Cancer
- Turpentine, intestinal permeability and the effects of, 43

## U

- Urea, hepatic synthesis
  - in acute/chronic uraemia, increased capacity, 206
  - elective cholecystectomy and, 10
- Urea-nitrogen, TPN for intestinal failure and enhanced retention of, 67

## V

- Venous nutrition, *see* Intravenous nutrition
- Vitamin A, clinical adsorption and photodegradation of, 348

**Vitamin E**

clinical adsorption and photodegradation of, 348  
dietary deficiency, plasma zinc and copper  
concentration in, 233

Volume load in peripheral venous nutrition, phlebitis  
and its relation to, 71

**W**

Water, total body, renal dialysis and the assessment of  
changes in, 81

Weight in the over-65s, 18

Whey proteins (and their peptides/amino-acids), ileal  
mucosa of fed/starved rats and the effects of  
dietary, 49

**Z****Zinc**

acute infection-related status, 55  
somatomedin-C (insulin-like growth factor) decline  
with deficiency of, 284  
vitamin E dietary deficiency affecting plasma  
concentrations of, 233
